

Sawnply+™ Solid-Balanced Construction offers unmatched performance in difficult climates

- Highest performing hardwood flooring in the industry.
- Proven to perform better in climates where Relative Humidity (RH) can have broader ranges than typical climates.
- Hardwood lumber core, plus matching top and bottom SawnPly+™ veneer, enable Rhone Flooring to achieve the widest range of acceptable relative humidity environments.
- Out-performs plywood-core engineered & solid wood.

3/4" Thick Product: 25%-80% RH
